2019 Website Report

The RMLL continues to use the SportzSoft modules for the RML System and the RMLL website.

SportzSoft Admin – overall management of players and bench personnel;
SportzSoft Team Standings/Team Stats – online management of franchise rosters, player stats and Division standings as well as franchise administration access for Franchise Certificates, rosters, announcements, events and scheduling input;
SportzSoft Scheduler – input of time slots and development of Division schedules;
SportzSoft Publisher – maintenance of the RMLL website;
SportzSoft Game Scoring App – allows real time entry of game sheet stats;
SportzSoft LiveLeague Phone App - for iPhone and Android Phones. Allows users to quickly find scheduled games and follow live scores and stats for those games as well as viewing the scores and stats from past games.

Player Stats:
All franchises continued to enter their home game stats directly into the RMLL System. Jr. A and Tier I franchises used the Live Game Sheet (Game Sheet App) which runs on an iPad or an Android Tablet. The franchises in Sr. B, Sr. C, Tier II, Tier III, Jr. and Sr. Ladies continued to all enter their information from their home game sheets into the system after their games. This year in order to provide current stats and standings, the stats and standings were updated as soon as a Franchise entered their game stats. The system was enhanced to allow game sheet stats to be verified after the stats were posted.

Website:
We implemented a new website in 2019 which is mobile friendly. Migrating over ten years of information was a lot of work. There is still work left to do on the website and the refinements are now being worked on.

Amanda Thielen continued her role as the RMLL Webmaster and administrative support help to the RMLL teams.

We will continue using SportzSoft modules and will continue to refine and enhance our website with new functionality throughout the 2020 Season.

Christine Thielen
Executive Director, RMLL
